Experience

Now **Senior Data Scientist, Illumina**

- 2021 Nov ○ Lead strategic bioinformatics R&D for multiple pioneering cancer companion diagnostic programs leveraging the industry-leading DRAGEN platform. Oversaw high-value data deliverables which directly contributed to multimillion dollar contract milestones.
- Designed, deployed and maintained organizational-wide bioinformatics and data science tools in Python and R. These tools were foundational infrastructure for high-throughput clinical product development. These tools had a significant improvement on the overall efficiency of product R&D and reduced the data verification processes from several months to hours.
- Spearheaded a comprehensive review of organizational data management practices for the clinical and medical operations teams. Developed and formalized a scalable framework to enhance data velocity and data standardization. This streamlined decision-making and data verification bottlenecks that will ultimately fast-track critical data deliverables.
- Supported cross-functional stakeholders comprised of R&D scientists, clinical biostatisticians, software developers, regulatory bodies, external vendors and pharmaceutical partners to achieve regulatory milestones for IVD (US and EU). Demonstrated strong expertise in stakeholder management and leadership.
- Developed machine learning algorithms to analyze large-scale genomics datasets, uncovering clinically-actionable insights that significantly enhanced the performance of oncology diagnostics and prenatal testing products.
- Lead and authored a high-impact publication for a clinical oncology product's benefits for blood cancer.

2021 Oct **Statistician, CSL Behring**

- 2020 Jul ○ Direct contributions to the R&D of high-value pharmaceutical products like the COVID-19 vaccines and treatments during the Pandemic.
- Designed and formalized statistical process control techniques to standardize practices in the manufacturing and quality control laboratory. These tools are deployed through interactive dashboards which had a wide organization impact.
- Provided actionable insights to multiple products which mitigated significant regulatory risks and achieved significant financial savings, with some up to multimillion dollars production batches.

2020 Jun **Research Associate, University of Sydney**

- 2019 Sep ○ The major research project developed an interpretable machine learning framework for predicting patient clinical outcomes using omics data. Melanoma was a key focus of this research and the key biomarkers were validated and implemented on a cost-effective assay.
- R software packages associated with the research were developed and maintained in a reproducible environment.
- Visiting scholar at Cornell University for 2 months. Designed and hosted a workshop in open-source single-cell analytics using Cloud technology.
- Published peer-reviewed articles in top-tier journals, including PNAS, Nature Digital Medicine and Nature Computational Science.

2019 Mar **Postgraduate Teaching Fellow, University of Sydney**

- 2016 Mar ○ Delivered lectures (200+ students) and tutorials, covering 15 different courses, including statistics, mathematics and data science. Achieved 85% satisfactory rating for end-of-course surveys.
- Authored and designed course content at both the undergraduate and postgraduate levels.
- Mentored and trained junior statistics tutors.

Education

- 2016–2020 **Doctor of Philosophy in Statistical Bioinformatics**, *University of Sydney*
- Developed machine learning methods to solve statistical challenges in patient clinical outcome predictions and thereby enabling personalised medicine.
 - Real-world biomedical data from collaborators were used to motivate and articulate important challenges in current statistical research. The value of this thesis is the synthesis of statistics, clinical implementation and practical deployment.
- 2012-2015 **Bachelor of Science (Adv. Mathematics) (Hon. I)**, *University of Sydney*
- Major in statistics and financial mathematics.
 - The Honours thesis examined functional MRI data and the inferred brain connectivity networks through the use of different statistical association measures.

Skills

- python Developed computational modules for regulated products at Illumina to support clinical studies. Highly proficient in writing scripts and notebooks to solve analytical problems for stakeholders. Experience in using and applying pandas, numpy, scikit-learn, keras, pytorch, and openai for a range of projects.
- R Highly proficient in scripting and developing packages. Strong ability to use tidyverse and shiny for the data ETL process to produce visualisations and presentable insights. Author and maintainer of several open-source R packages, including APES, learningtower, mcvis and scMerge.
- git & CI/CD & docker Highly proficient in a reproducible environment that supports business operations and software development requirements. Experience in holding reproducible workshops with excellent participant feedback.
- Applied statistics Highly experienced at the research level and consulting level. Ability to transform business and cross-disciplinary problems into a statistical framework and deliver solutions. Strong experience with model selection to extract explainable insights from data.
- Statistical modelling Highly experienced at the research level and consulting level. Specialisation in predictive modelling for high-dimensional data.
- Other skills SQL, cloud and dashboard development for business use.

Volunteering

- 2021-Present **Mentor**, *Monash University*
- Supervised and mentored three Master of Data Science students with the students successfully completed their research projects. Developed high-quality R-CRAN package and published academic journal article.
- 2021-2023 **Councillor**, *Statistical Society of Australia*
- Served as the Assistant Secretary and Communication Officer in the NSW and Victorian Branch of the Society. Organised public events, designed automated management systems, responsible for member communications and social media account maintenance.

Selected Awards

- 2019 **Statistical Society of Australia, NSW, JB Douglas Award (runner-up)**. *Annual competitive prize awarded to the top statistics research PhD candidate in the State.*
- 2019 **Statistical Society of Australia, Golden Jubilee Travel Grant**. *Annual competitive travel funding for a statistics PhD candidate in Australia.*
- 2017 **International Biometric Society - Australasian Region, Best student talk at the biennial conference**.
- 2016-2020 **Australian Postgraduate Award**, *for the duration of the PhD program at the University of Sydney.*
- 2015 **International Biometric Society - Australasian Region, Honours scholarship award**. *Annual award to the top biostatistics student undertaking an Honours program in AU/NZ region.*
